

Dina Valisoa RANDRIAMIFIDY

Software Engineer

Active since 2022, I've spent 3 years building real products and growing through every challenge. Passionate about technology and constantly learning, I aim to lead major projects in the years to come, make a significant impact, and always seek new opportunities to grow.

Skills

Quick and self-directed learner, able to pick up new technologies and skills independently.

Education

Master 2 - MIAGE MBDS — From 2024 to Oct. 2026
Univerisité de Cote d'Azur , France
Mobiquity, Big Data, Data Science and Systems Integration Course

Bachelor degrees in Computer Science — From 2020 to 2023
IT University, Madagascar
With very good mention

Work experience

Fullstack developer Java / Typescript — Since Dec. 2024 (2 years)
Ibonia, Antananarivo

- Contributed to a FinTech platform processing 400M+ Ar and 6,000+ payments (Mobile Money, Visa/Mastercard)
- Optimized payment pipeline, cutting response time from 3–5 min down to near real-time
- Built reusable npm libraries, reducing duplication and standardizing the codebase
- Refactored legacy code using DDD, improving module decoupling; mentored junior developers and interns

Fullstack developer / AI Engineer — From July 2025 to Jan. 2026 (6 months)
Freelance, Romania

- Migrated a legacy codebase to clean architecture, improving readability, testability, and maintainability
- Built an AI-powered email classification and auto-response system, reducing manual prospect triage
- Migrated company website from Wix to Next.js + TinaCMS, boosting performance and enabling full editorial autonomy
- Integrated FareHarbor & Ebriza APIs for real-time AI responses; reverse-engineered FareHarbor for direct order integration

Software Engineer — From 2024 to Dec. 2024 (11 months)
eTech Consulting , Antananarivo, Madagascar

- Integrated an OCR module into Odoo, automating document extraction and eliminating manual entry for 600+ employees
- Contributed to HR, Payroll, and Invoicing ERP modules deployed across the entire group
- Built and deployed an internal book reservation platform adopted company-wide

Software Developer Java — From 2023 to Jan. 2024 (1 year)
BICI, Antananarivo

- Built a CRUD interface generation engine supporting MySQL, SQL Server, Oracle, and PostgreSQL — zero repetitive boilerplate
- Developed a DBeaver-inspired database management tool with a simplified UI for non-technical users
- Handled ERP support and Oracle/PostgreSQL administration for dock management and payroll systems
